Proposed Study Guide “Medical Statistics” intended for medical students. Compiled taking into account the volume of the study load, plan and program in medical statistics. The manual presents in an accessible form the concepts and methods for calculating the basic statistical quantities. Along with the presentation of classical statistical methods, new methods are applied that necessary in the practice of a doctor. The need for a textbook is proven by the modern development of medicine, since knowledge of the basics of medical statistics is necessary for any doctor not only in practical but also in research work.

It is intended for the students of faculty of foreign citizens.
